Targeted courses

Intermediate Oil and Gas Seminar – Date TBC

Duration:	Full-day	Cost:	£150
Pre-course Knowledge:	You should have some previous knowledge of Strategic Export Controls and reviewed the Consolidated Control List before attending this course.		
Description:	A tailored version of the Intermediate Seminar (above) with a focus on how Strategic Export Controls apply to the Oil and Gas sector		

Licences Workshop

Duration:	Half-day	Cost:	£108
Pre-course Knowledge:	You will have some experience of making licence applications (if relevant) and undertaken prior training from the Learning Path		
Description:	This is a NEW Workshop aimed at improving the permissions exporters obtain to export, reducing the number of licences required and improving compliance		
<p>With the wealth of Export Control Licences available to UK exporters, finding the right one to enable your company to export efficiently can be daunting. Based on course feedback, input from the SPIRE replacement program (LITE), and our Compliance Unit, this course is aimed at guiding exporters through the licence types available; deciding which one is right for your export.</p> <p>Attendees will first be taken through the core Standard and Open Individual Export Licence (SIEL and OIEL) application screens to demonstrate how prior planning can reduce the number of 'Requests For Information' (RFIs), reduced work and quantity of licences required.</p> <p>The course will then turn to Open General Licences (OGLs and EU GEAs); covering what is available, online resources and how to read OGLs to improve compliance with the terms and conditions.</p> <p>There will then be exercises to put the theory into practice. Please therefore include in your application an OGL you would like us to consider for review, or a particular issue you've had with Standard or Open Licences, and we will endeavor to use relevant examples.</p>			

Control list classification and using the checker tools

Duration:	Full-day	Cost:	£240
Pre-course Knowledge:	You will have some knowledge or experience of the classification (rating) process. We recommend the beginners workshop or intermediate seminar first.		
Description:	A course to provide guidance on identifying the control list entries that apply to your goods software and technology.		

Workshops will concentrate on classifying military and/or dual-use goods.

Outline:

- Export control lists – where they come from, including relevant legislation
- Military goods and dual-use goods – how to find them on the relevant list
- How to understand the terms and language used in control list entries
- Basic classification exercises – some general examples
- Software and technology controls
- Classification exercises using the Goods Checker tool
- Introduction to the OGEL (Open General Export Licence) Checker

Class sizes for this course are limited to 10 persons. For this reason, these courses fill up quickly and we often have a waiting list. If you book and subsequently find you cannot attend, please let us know so that we can offer your place to someone else.

Description:	Reduce the number of Requests for Further Information (RFIs) and withdrawn/stopped cases returned to licence applicants.		

Attendees will be taken step-by-step through the licence application process on SPIRE. The type of information required, and the reasons for requiring that information, will be explained at each stage, identifying common pitfalls and mistakes.

There will also be an opportunity to share best practice with other attendees.

Standard Individual Export Licence (SIEL) End Use Undertaking requirements will also be covered and the End-User Advice service will be explained
